

You need:

- ☆ 2 dice
- ☆ Pen and paper

1. Roll the two dice.
2. Divide the larger number by the smaller number.
3. Write down the remainder.

$$5 \div 2 = 2 \text{ r } 1$$

4. Do this 10 times.
5. Find the total of the 10 remainders. This is your game score.
6. Play the game again and see if you can beat your game score.
The highest possible game score is 20.
How close did you get?
